ENROLING IN A SELF PACED COURSE

The CPC40120 Certificate IV in Building and Construction (Building) is designed for those seeking to develop their knowledge and skills in residential building and construction and help them achieve their goals for a better career in the industry.

We value your time

Unlike traditional courses with fixed schedules, our self-paced format allows learners to progress at their own pace, providing the necessary flexibility for individuals with limited time availability and varying work hours.

We understand your learning needs

Recognising diverse learning styles and preferences, our Training Strategy focuses on fostering a flexible learning environment. Through our self-paced course, learners gain autonomy over their studies, allowing them to learn on their terms.

We commit to your success

At Parker Brent, your success is our ultimate priority. Our self-paced course equips you with the tools for an efficient educational journey, and we are here to support you every step of the way to make your learning experience truly transformative and rewarding.

This Certificate course has definitely opened my eyes to the legal side of construction like what to do with councils. These are the things I never had to do the whole time I spent working in construction. Parker Brent has been really helpful on that side and I never had issues with asking help when I needed it.

Hasnain Haider

Great training provider. During my training for Certificate IV, I have seen personally that Parker Brent has deployed a team of professionals to make the training journey of each trainee easy, joyous and comfortable. They are continuously following up the progress, and eager in solving difficulties we face. I can say that it was the best decision I made by enrolling with Parker Brent for my Certificate IV course. I would be undertaking my Diploma also with them after completing this. I wish great success for their dedicated services.

COURSE CONTENT

This course has been structured to reflect the process of building a property and as a result, the proposed topics have been carefully mapped to the units of competencies currently delivered by Parker Brent:

Our course stands out due to its structure that matches the **construction lifecycle**. Each competency aligns with a construction stage, aiding your clear understanding from beginning to end. This distinct approach empowers you with insights and skills, vital for a successful career in building and construction.
